Lab02

Exercise 3

3.1)

The server returns a 200 OK status code to the client.

3.2) When was the HTML file the browser retrieves last modified at the server? Does the response also contain a DATE header? How are these two fields different?

The HTML file was last modified on Tue, 23 Sep 2003 05:29:00 GMT.

The response also contains a date header.

The 'date' header represents the time when the message was sent. This is contrasted by 'last modified' which tells the user when the file lab2-1.html was last changed at the server.

3.3) Is the connection established between the browser and the server persistent or non-persistent? How can you infer this?

The connection between the browser and server is persistent. We can conclude this because the 'Connection' header is 'Keep Alive' and represents the persistency of a connection. Additionally, the HTTP version used is HTTP/1.1 and this version assumes all connections are persistent unless specified.

3.4) How many bytes of content are being returned to the browser?

73 bytes of html content are returned:

```
    Hypertext Transfer Protocol
    HTTP/1.1 200 OK\r\n
    Date: Tue, 23 Sep 2003 05:29:50 GMT\r\n
    Server: Apache/2.0.40 (Red Hat Linux)\r\n
    Last-Modified: Tue, 23 Sep 2003 05:29:00 GMT\r\n
    ETag: "1bfed-49-79d5bf00"\r\n
    Accept-Ranges: bytes\r\n
    Content-Length: 73\r\n
```

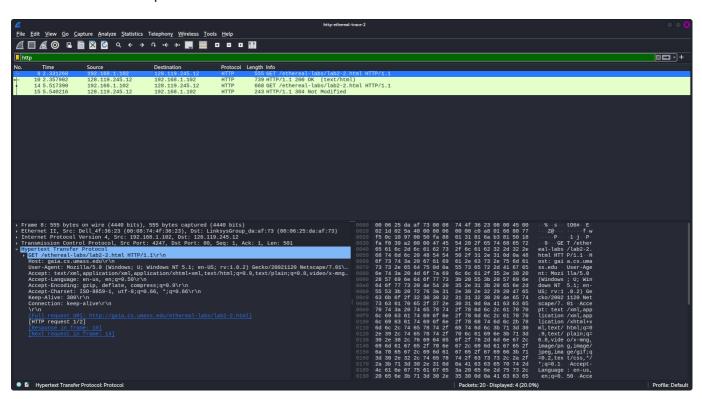

3.5) What is the data contained inside the HTTP response packet?

The data inside the HTTP packet is a HTML file.

Exercise 4

4.1) Inspect the contents of the first HTTP GET request from the browser to the server. Do you see an "IF-MODIFIED-SINCE" line in the HTTP GET?

The first HTTP GET request from the browser to server does NOT have "IF-MODIFIED-SINCE" field.

4.2) Does the HTTP response from the server indicate the last time the requested file was modified?

Yes, the server shows the last time the file was modified at: Tue, 23 Sep 2003 05:35:00 GMT\r\n

No.	Time	Source	Destination	Protocol	Length Info	
-	8 2.331268	192.168.1.102	128.119.245.12	HTTP	555 GET /ethere	al-labs/lab2-2.ht
-	10 2.357902	128.119.245.12	192.168.1.102	HTTP		0 OK (text/html)
+	14 5.517390	192.168.1.102	128.119.245.12	HTTP		al-labs/lab2-2.ht
+	15 5.540216	128.119.245.12	192.168.1.102	HTTP	243 HTTP/1.1 30	4 Not Modified

	[Next request in					
	[Next response i					
			du/ethereal-labs/lab2	-2.htmll		

4.3) Now inspect the contents of the second HTTP GET request from the browser to the server. Do you see the "IF-MODIFIED-SINCE:" and "IF-NONE-MATCH" lines in the HTTP GET? If so, what information is contained in these header lines?

Yes, the "IF-MODIFIED-SINCE:" and "IF-NONE-MATCH" headers are present.

"IF-MODIFIED-SINCE:" makes this request conditional if it has been modified after the date 'Tue, 23 Sep 2003 05:35:00'

"IF-NONE-MATCH" contains the E-tag value. Tt makes this request conditional if it doesn't have an E-tag header. The E-tag value is: "1bfef-173-8f4ae900"

```

  Hypertext Transfer Protocol
      GET /ethereal-labs/lab2-2.html HTTP/1.1\r\n
      Host: gaia.cs.umass.edu\r\n
User-Agent: Mozilla/5.0 (Windows; U; Windows NT 5.1; en-US; rv:1.0.2) Gecko/20021120 Netscape/7.01\r\
      Accept: text/xml,application/xml,application/xhtml+xml,text/html;q=0.9,text/plain;q=0.8,video/x-mng,i
      Accept-Language: en-us, en;q=0.50\r\n
Accept-Encoding: gzip, deflate, compress;q=0.9\r\n
Accept-Charset: ISO-8859-1, utf-8;q=0.66, *;q=0.66\r\n
      Keep-Alive: 300\r\n
      Connection: keep-alive\r\n
      If-Modified-Since: Tue, 23 Sep 2003 05:35:00 GMT\r\n
If-None-Match: "1bfef-173-8f4ae900"\r\n
      Cache-Control: max-age=0\r\n
      r\n
       [HTTP request 2/2]
```

4.4) Question 4: What is the HTTP status code and phrase returned from the server in response to this second HTTP GET? Did the server explicitly return the file's contents? Explain

```
    Hypertext Transfer Protocol
    HTTP/1.1 304 Not Modified\r\n
        ▶ [Expert Info (Chat/Sequence): HTTP/1.1 304 Not Modified\r\n]
        Response Version: HTTP/1.1
        Status Code: 304
        [Status Code Description: Not Modified]
        Response Phrase: Not Modified
        Date: Tue, 23 Sep 2003 05:35:53 GMT\r\n
        Server: Apache/2.0.40 (Red Hat Linux)\r\n
        Connection: Keep-Alive\r\n
        Keep-Alive: timeout=10, max=99\r\n
        ETag: "1bfef-173-8f4ae900"\r\n
        \r\n
        [HTTP response 2/2]
```

The response HTTP code is 304 and says 'Not Modfied'. This means the file (lab2-2.html with E-tag "1bfef-173-8f4ae900" on the client) will not be resent (not explicitly return) from the server because it has not been changed from since the browser's GET request in the header "IF-MODIFIED-SINCE: Tue, 23 Sep 2003 05:35:00".

4.5) What is the value of the Etag field in the 2nd response message, and how is it used? Is the Etag value the same as in the 1 st response?

The E-tags are the same in the 1st and 2nd response.

The E-tag in the 2nd response is: "1bfef-173-8f4ae900"

```
Hypertext Transfer Protocol

HTTP/1.1 304 Not Modified\r\n

→ [Expert Info (Chat/Sequence): HTTP/1.1 304
Response Version: HTTP/1.1
Status Code: 304
[Status Code Description: Not Modified]
Response Phrase: Not Modified
Date: Tue, 23 Sep 2003 05:35:53 GMT\r\n
Server: Apache/2.0.40 (Red Hat Linux)\r\n
Connection: Keep-Alive\r\n
Keep-Alive: timeout=10, max=99\r\n
ETag: "1bfef-173-8f4ae900"\r\n
```

The E-tag in the 1st response is: "1bfef-173-8f4ae900"

```
